

Field Equipment Housed in Darwin Labs

The following list contains field equipment housed in the Darwin Labs for use in teaching and research within the School. Equipment is available to staff and students to aid teaching and research projects. Undergraduate field schools are heavy users of the equipment at certain times of the year, particularly in the summer term (after Easter) and September. At these times it may not be possible to borrow certain items for other activities.

To borrow equipment please email Graham Walker <G.Walker@ed.ac.uk> or phone to check availability and any costs involved.

The list below is a summary of what is available. Do not assume that presence of an item below means it is available to be used. Email as early as possible to check availability and suitability. This list will be upgraded over time to reflect new purchases.

NOTE Technical assistance is mandatory with certain pieces of equipment.

Category	Equipment	Comment
Sampling /Measurement Equipment	Soil Corers	
	Pressler Borer	
	Nets	Assorted
	Longworth Traps
